

CloudOpt Launches Speed-as-a-Service for Windows Azure Cloud

[Chris Burt](#) on October 21, 2013

WAN optimization company [CloudOpt](#) has announced the availability of its Speed-as-a-Service data acceleration solution for Microsoft Windows Azure.

The software-as-a-service will be offered in Windows Azure US-West and US-North Central regions before expanding according to demand.

CloudOpt claims that Speed-as-a-Service can reduce data transfer times and costs by as much as 90 percent, enabling large data transfers into and out of the cloud. It also reduces duplication, lowering bandwidth use and associated charges.
